

The DYKNOW™ Software Suite

What is DyKnow Monitor?

DyKnow Monitor® allows teachers to maintain control of the digital classroom and foster responsible computer use.

Using Monitor, teachers can view thumbnail images of student screens, block non-curricular applications and URLs, lock keyboards and mice on specific computers and even take remote control of a student's computer. Teachers can monitor lab and mobile computers using class rosters, computer locations, or both. DyKnow Monitor's design allows for central server management and bandwidth optimization, reducing administrative requirements while allowing hundreds of computers to be monitored in wired and wireless environments.

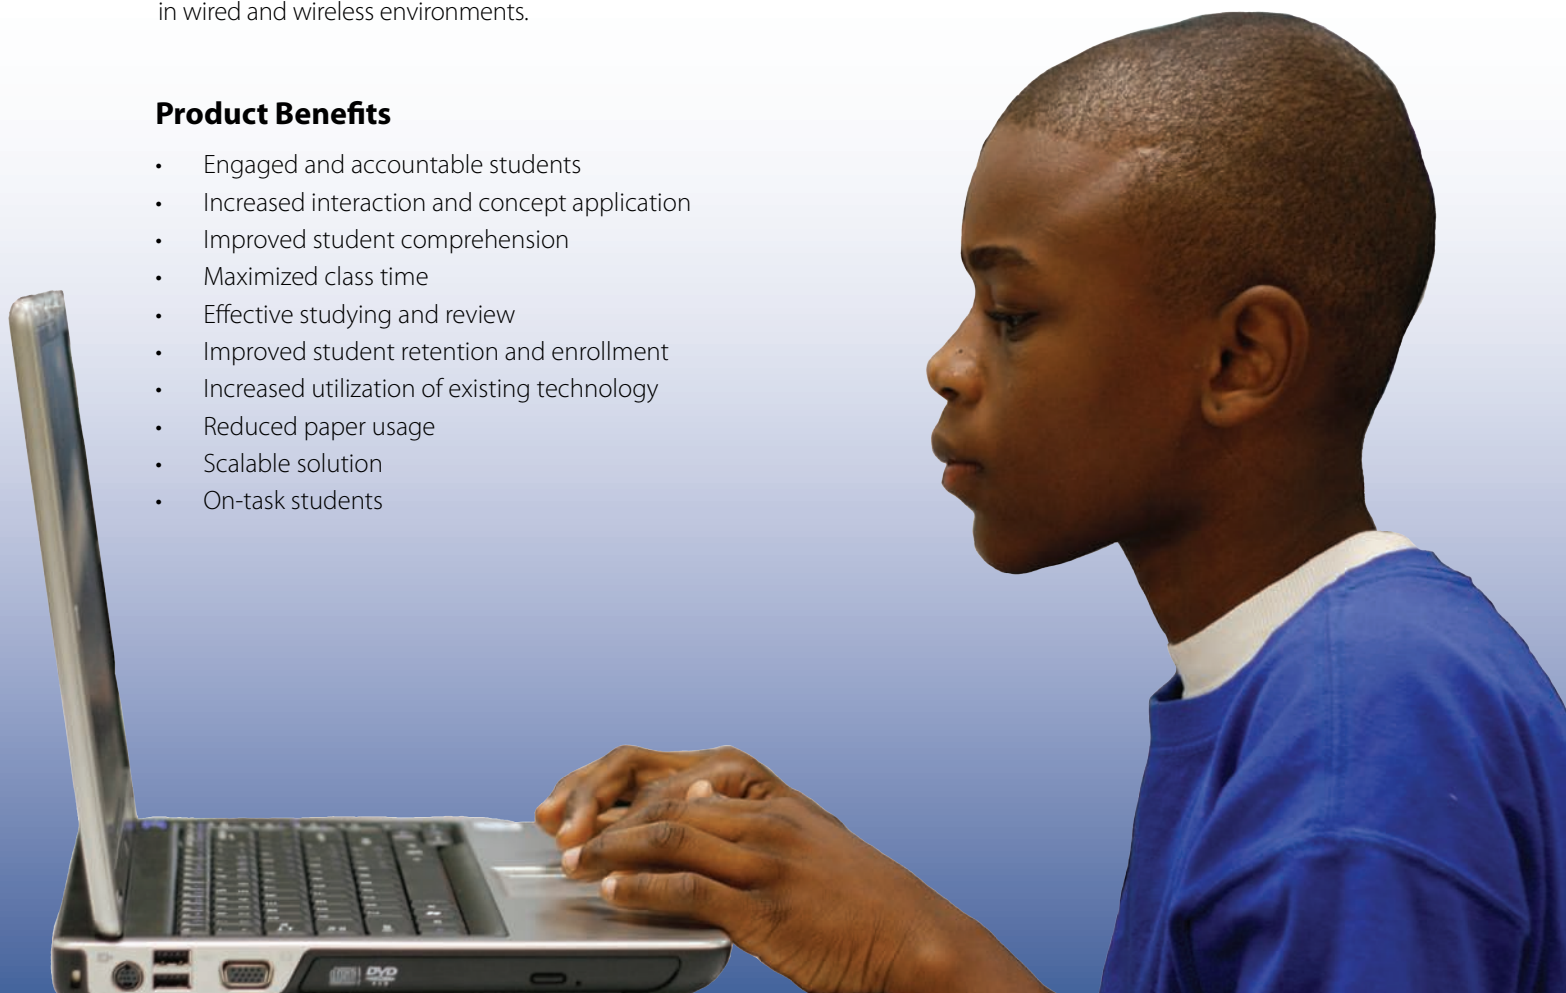

Product Benefits

- Engaged and accountable students
- Increased interaction and concept application
- Improved student comprehension
- Maximized class time
- Effective studying and review
- Improved student retention and enrollment
- Increased utilization of existing technology
- Reduced paper usage
- Scalable solution
- On-task students

What is DyKnow Vision?

DyKnow Vision® is an interactive teaching tool used to maximize class time, foster collaborative learning and promote effective studying.

Using DyKnow Vision, teachers can instantly transmit prepared or extemporaneous content to students' computers for annotation, spark discussion by sending out a poll or broadcasting a student's screen; even empower students to lead class and share work from their seats. DyKnow notes and audio can also be saved on a central server where students can access and replay them anytime, anywhere—perfect for today's mobile learner.

DyKnow® is engaging students through interactive education technology. Teachers can “Engage Students Now” by creating a collaborative learning environment with the DyKnow Software Suite® which includes DyKnow Monitor® and DyKnow Vision®.

Optimized in both wired and wireless computing environments, DyKnow software can be used on desktops, laptops, Tablet PCs or interactive whiteboards.

Schools no longer need to rely on separate systems to manage the digital classroom, deliver class content, create engaging activities and give students anytime, anywhere access to material. Together, DyKnow Monitor and DyKnow Vision are the total classroom solution.

Engage Students Now

The DyKnow Advantage

1. Minimize Electronic Distraction

- Block access to non-curricular applications and URLs.
- Take remote control of a student's computer to help clarify a concept.
- Lock the keyboard and mouse on one or more computers.
- Blank students' screens and send an on-screen message.

2. Maximize Class Time

- Instantly transmit prepared or extemporaneous content to student computers.
- Let students personalize teacher content by electronically annotating the teacher's notes and adding key points.
- Retrieve, grade and return student work all with one click of a button.

3. Gather Student Feedback

- Send out a customized poll for immediate assessment.
- Save the results of a poll for later review.
- Send out a “status request” to gauge class understanding.

4. Foster Collaborative Learning

- Empower students to lead class by “sharing control” of the teacher's workspace.
- Broadcast a student's screen for a teachable moment.
- Give students access to a shared workspace where they can collaborate with other students from their seats.

5. Promote Effective Studying

- Give students and teachers anytime, anywhere access to class content with DyKnow's server-stored notes.
- Use the replay feature to see a stroke-by-stroke review of course content.
- Access an audio recorded lecture synchronized with content in a DyKnow notebook.

..... [With DyKnow], we've become more active during class. We get into what we're talking about more. Before when teachers were just talking and we were just taking notes, we were bored.

— Emily Park
Student, Auburn City Schools
